

# Frames

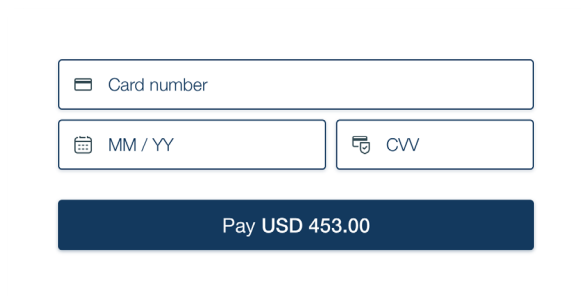

Frames is an embeddable payment form for websites that allows customers to securely enter their payment details directly on your checkout page. Frames are fully customizable so you can design a checkout experience that matches your website and brand.

## Design and customize Frames for the optimal checkout experience.

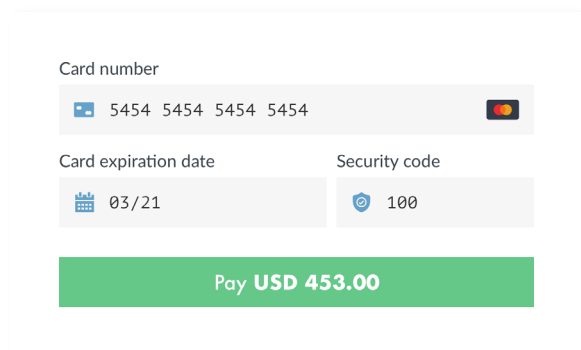

Endless configuration options lets merchants design forms ranging from simple to sophisticated.

A minimalist payment form with a white background. It features a single input field containing a Visa card number (4242 4242 4242 4242), an expiration date (07 / 24), and a CVV (100). To the right of the input field is a dark blue 'Pay' button.

Minimalist

A classic payment form with a white background. It has three input fields: 'Card number' with a card icon, 'MM / YY' with a calendar icon, and 'CW' with a security code icon. Below these is a dark blue button labeled 'Pay USD 453.00'.

Classic

A distinctive payment form with a white background. It features three input fields: 'Card number' with a card icon and a Mastercard logo, 'Card expiration date' with a calendar icon, and 'Security code' with a security code icon. Below these is a green button labeled 'Pay USD 453.00'.

Distinctive

## Features

- Add your own HTML elements to customize the payment form
- Customers' payment information is processed by Checkout.com, then tokenized
- Localize the payment form with our pre-set languages or create your own
- One-liner forms are available for even faster checkout

## Benefits

- Boost conversion. Avoid redirects which can delay the checkout process and lead to abandoned transactions
- Fast and easy integration with Checkout.com
- Preserve brand consistency. Design a checkout form that matches your website or brand
