

Supercharge your Logistics with FreightPOPs NetSuite Integration

Reduce costs, eliminate double data entry and errors, and seamlessly automate your freight and shipping process.

INTEGRATIONS

Streamline Your Logistics

Oracle NetSuite is one of the world's most popular ERP solutions for small and medium businesses. Take advantage of truly integrated customer workflow from customer order, to shipping and invoicing across multiple freight and shipping modes by integrating your NetSuite ERP with FreightPOP's transportation management solution!

Built by shippers, for shippers, FreightPOP connects to your existing business systems to optimize your company's logistics planning, execution and analysis workflows faster than you thought possible – AND for a price you can afford.

TRUSTED BY GREAT COMPANIES

ORACLE NETSUITE

NetSuite is the world's leading provider of cloud-based business management software, helping companies manage core business processes with a single, fully integrated system covering ERP/financials, CRM, ecommerce, inventory and more.

Current Available Regions: North America

EASY TO DEPLOY

One Day Integration

With a fully native integration to the Netsuite Application, you can be up in running in just one day.
