SEPTEMBER 2021

EconoBeat

A comprehensive monthly dialogue on leading indicators
India’s gross domestic product (GDP) accelerated to 20.1 percent YoY in the first quarter of FY 2021.

The GDP soared to a record high on the back of low base and improved consumer sentiments amid the accelerated inoculation.

Indian economy witnessed growth despite the drag of a more severe second wave. The impact of local lockdowns was not as severe as the national lockdown in the year ago period.

The GDP at constant prices (base: 2011—12) is estimated at INR 32.38 lakh crore in Q1 FY 2021 compared to INR 26.95 in the year ago period.
India’s retail inflation continued to ease marginally reaching a four-month low of 5.28 percent in August 2021. The CPI inflation was pegged at 5.59 in the previous month.

The CPI inflation in urban areas also eased to 5.30 percent in August 2021, compared to 5.82 in the previous month.

The retail inflation continues to stay within the RBI’s target band of 2—6 percent.

The moderation of prices was recorded in all components except clothing, footwear, fuel and power. The food prices cooled down further in August 2021 on the back of reduced inflation in vegetable prices.

The WPI inflation resurged to 11.39 percent in August 2021, compared to 11.16 percent in the preceding month.

The wholesale price-based inflation flared up on the back of rise in prices in mineral oils, crude petroleum & natural gas; manufactured products like basic metals; food products; textiles; chemicals and chemical products.

The Manufacturing Purchasing Managers Index (PMI), slipped to 52.3 in August 2021 compared to 55.3 in the previous month. However, it continued to remain in the expansion zone.

The overall rate for expansion momentum for Manufacturing PMI subsided in August, as the cost pressures and threat of resurgence of cases continued to affect the stakeholder confidence.

India Services PMI expanded and reached 56.7 in August 2021, after staying in the contraction zone for the past three months.

The services sector activity rose on the account of lifting of restrictions, opening of firms, inflow of new work and improving demand.

According to PMI parlance, a reading above 50 indicates expansion, while below 50 indicates contraction.
The non-food credit growth grew at 6.2 percent YoY in July 2021, compared to 6.4 percent same period the previous year.

The advances to agriculture and allied services continued to perform well, registering a YoY growth of 12.4 percent in July 2021, compared to 5.4 percent in the year ago period.

Credit growth in the services sector remained subdued and was pegged at 2.7 percent YoY in July 2021 compared to 12.2 percent in July 2020.

The personal loans accelerated by 11.2 percent in July 2021 compared to 9.0 percent a year ago on the back of loan against gold and vehicle loans.

The credit in the housing sector (including the priority sector) grew at 8.9 percent YoY in July 2021.
Industrial production registered a growth of 11.5 percent YoY in July 2021 compared to contraction of 10.5 percent in the same period of the previous year.

All sectors such as mining, manufacturing, and electricity recorded double-digit growth in July 2021 compared to the year-ago period.

The general IIP pegged at 131.4 in July 2021 is almost at par with the July 2019 levels where the index was 131.8, indicating a stronger rebound compared to the first wave of the pandemic last year.
The unemployment rate in India saw a spike in August 2021 and reached 8.32 percent compared to 6.95 the previous month.

The unemployment in urban areas grew at 9.78 percent in August 2021 compared to 8.3 percent in July 2021.

The rural areas too recorded an increase of 7.64 percent in the unemployment rate compared to 6.3 percent growth in the previous month.

Though the economic activities have opened up across India, the job market is still striving to revive from the set back of the second wave of the pandemic.

Unemployment rate at three-month high
